

Tsowa Kolo Felix

Software Engineer | Full-Stack • Frontend • Mobile Engineer

Abuja, Nigeria | +2349032328670 | +2348083015134 | tsowafelix0@gmail.com | [Portfolio](#) | [Github](#)

Software Engineer with **4+ years of professional experience** building scalable, production-ready web and mobile applications across **AI, SaaS, FinTech, AgriTech, e-learning, and enterprise products**.

Strong hands-on experience with **React, Next.js, TypeScript, JavaScript, Node.js, NestJS, React Native, PostgreSQL, MongoDB, Firebase, REST/GraphQL APIs, AWS, and modern frontend architecture**. Experienced in building responsive user interfaces, backend services, real-time applications, AI-enabled workflows, authentication and RBAC systems, third-party integrations, and cloud-deployed applications.

Proven ability to take ownership of features across the software development lifecycle—from requirements and architecture through implementation, testing, deployment, monitoring, performance optimization, and continuous improvement. Comfortable collaborating with distributed engineering, product, design, and client teams to transform complex requirements into reliable, maintainable software.

CORE TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, R, Python, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Vite, Tailwind CSS, Material UI, ShadCN/UI, Responsive Design, Accessibility

State & Data Management: TanStack/React Query, Redux, Zustand, Context API, SWR

Backend: Node.js, Express.js, NestJS, REST APIs, GraphQL

Mobile: React Native, React Native CLI, Android, Ios

Databases & Data: PostgreSQL, MongoDB, Firestore, Firebase, DynamoDB

Real-Time Systems: WebSockets, Socket.io, Firebase, Push Notifications, Real-Time Data Synchronization

AI Integration: OpenAI API, LLM-Enabled Applications, AI-Powered Workflows

Cloud & DevOps: AWS, Docker, CI/CD, GitHub Actions, S3, EC2, Lambda, RDS, CloudFront

Security & Authentication: JWT, OAuth2, RBAC, Clerk, Input Validation, Encryption, OWASP Practices

Testing: Jest, React Testing Library, Cypress, Playwright

Performance: Code Splitting, Lazy Loading, Caching, Rendering Optimization, Lighthouse

Monitoring: Sentry, Datadog, LogRocket

Tools & Collaboration: Git, GitHub, Figma, Jira, Agile/Scrum

EXPERIENCE

Frontend Engineer | Rhenari — Remote

AI Workflow Platform • Microsoft Teams App • Admin Dashboard

- Developed scalable, interaction-focused applications using **React, Next.js, TypeScript, and Tailwind CSS** for an AI-powered workflow and roadmap platform.
- Built reusable component systems supporting both the **Microsoft Teams application and administrative dashboard**.
- Integrated frontend applications with backend APIs and real-time data services for responsive application experiences.
- Developed complex UI workflows supporting **AI-enabled functionality, asynchronous operations, and dynamic application states**.
- Improved frontend architecture, responsiveness, performance, maintainability, and component reusability.
- Collaborated with product and engineering teams to translate evolving product requirements into production-ready features.

Frontend Developer | Syncteam Studio — Chicago, US

AI Agent Workflow Platform

- Developed high-performance frontend experiences using **React and Next.js** for an AI-powered platform enabling users to design and execute workflows with teams of AI agents.
- Built responsive and reusable components for complex, interaction-heavy workflow experiences.
- Integrated frontend functionality with backend services and asynchronous application data.
- Implemented application states and user interactions for AI-driven workflow functionality.
- Collaborated with engineering and product stakeholders to transform complex requirements into intuitive user experiences.
- Contributed to improvements in frontend performance, usability, architecture, and maintainability.

Full-Stack Developer | Webloom — Bangalore, India

- Developed scalable production applications using **React, Next.js, TypeScript, Node.js, Firestore, PayloadCMS, and AWS**.
- Built reusable frontend components and application architecture across multiple customer-facing products.
- Designed and integrated REST APIs and third-party platforms including **Pipedrive**

and Zoho.

- Implemented secure authentication, authorization, and role-based access patterns.
- Worked with monorepo architecture and modern software development workflows.
- Contributed to cloud deployment, application performance, reliability, and maintainability.
- Collaborated with product and engineering teams across multiple client projects.

Frontend & Mobile Developer | Extension Africa — Nigeria

- Developed scalable web and mobile applications using **React, Next.js, React Native, TypeScript, React Query, and Firebase**.
- Integrated backend APIs, real-time data synchronization, and push-notification functionality.
- Used React Query for asynchronous data fetching, caching, loading states, error handling, and server-state synchronization.
- Implemented offline data storage using **MMKV and Firestore** to support reliable experiences under limited network connectivity.
- Built reusable components and application functionality across web and mobile products.
- Improved application performance, reliability, responsiveness, and overall user experience.

Frontend Developer | Paperdaz — California, US

Paperdaz • Junologix

- Developed responsive web applications using **React, Next.js, Vite, TypeScript, Redux, and React Query**.
- Built reusable frontend components and integrated applications with backend APIs and services.
- Used asynchronous state-management patterns for API data, caching, loading states, and application updates.
- Collaborated directly with clients and product stakeholders to transform requirements into production features.
- Wrote **Jest unit tests** to improve application reliability and reduce regressions.
- Diagnosed and resolved frontend issues while improving product usability and maintainability.

Full-Stack Engineer | Starnet Tech & Ent Innovation — Nigeria

- Built full-stack applications using **Next.js, Node.js, Express.js, MongoDB, and TypeScript**.
- Developed secure REST APIs, authentication systems, protected routes, and role-based permissions.
- Designed backend services supporting **SaaS and e-learning platforms** with real-time data synchronization.
- Developed **Telegram Mini Apps and administrative dashboards**.
- Applied input validation, encryption, authentication, and secure data-storage

practices.

- Built reusable application functionality across frontend and backend systems.

Software Engineer | Contract & Client Projects

- Delivered production web and mobile applications using **React, Next.js, React Native, Node.js, Express.js, TypeScript, and MongoDB**.
- Built responsive interfaces, reusable component systems, REST APIs, authentication systems, administrative dashboards, and third-party integrations.
- Worked directly with clients, founders, designers, and product teams to translate business requirements into production software.
- Contributed to products across **FinTech, SaaS, enterprise, and digital platforms**, including **Risevest, Invest Yield, and Liqfinity**.

EDUCATION

Federal University of Technology Minna, Nigeria - B. Tech Statistics.
